

Battlespace Awareness

Ultra Electronics, ProLogic delivers unparalleled C4ISR tools through the integration of our unique solutions and expertise with sensors, tactical data links, decision aids, weather, geospatial information management, visualization and analysis. Solutions that simplify, enrich, and share battlespace awareness for the net-centric warrior at tactical and strategic levels.

- Systems Engineering and End-to-End Integration
 - Expertise in SOA, ESB, XML, J2EE, .Net, SOAP/WSDL
- User-defined Operational Picture, Collaboration, Shared Situational Awareness
 - Weather forecast and impacts, space conjunctions, sensor performance, blast effects, plume dispersion, RF analysis
- Decision Aids – Modeling and Simulation, Operations Research
- Modeling and Simulation
 - HLA, DIS, visual simulation, complex data modeling
- Corelators, Links, Radar, Intelligence
- Geospatial Information Systems
 - Interactive 2D/3D/4D visualization
 - ArcGIS, CJMTK, STK, GoogleEarth
 - Weather Impacts
 - Diverse C4ISR data including Link-16, JRE, JMBL, JREAP-C, OGC, CoT, GeoRSS
- Solutions Focused on Ease of Use
- Key Credentials
 - Founded in 1995
 - Cleared personnel and facilities
 - Agency certifications and test experience
 - ISO 9001/2000
 - CMMI Level 3
 - Multiple government buying vehicles
